EXPERIENCE

Frontend Developer | Itway | Remote 2026 – Present

Baza-Taxi, fleet CRM for a Russian taxi company (dev.baza-taxi.ru)

- Took over a stalled AI-generated codebase as the sole frontend developer in a team of 7 and built about 70% of the Next.js, TypeScript and Mantine frontend, including a browser-style multi-tab workspace that keeps each tab's state and scroll position.
- Built infinite-scroll tables for 898,868 orders with RTK Query and TanStack Virtual: filters form the cache key and new pages merge into one cache entry, so scrolling never re-downloads loaded rows.
- Wired real-time WebSocket events (Laravel Echo, Reverb) into the RTK Query cache, so support messages, ticket changes and unread counts appear instantly.

Hi Bro, AI guide to restaurant menus (hibro.am, admin.hibro.am)

- Built the Next.js guest app (QR and camera menu scanning, AI chat, virtualized menu) and the React and Vite admin panel from scratch, with optimistic updates and rollback in TanStack Query.
- Built an AI menu reader for sites, PDFs and photos with shared rules instead of per-site code (Playwright in Docker for app sites); parallel photo downloads raised extraction from 31 to 35 of 36 photos.

Frontend Developer | Lumex Agency (USA) | Remote 2024 – 2025

- Led 2 frontend developers and delivered 12 client websites on Next.js, Solid.js and Payload CMS: new builds, features, refactoring and maintenance (nxtarmor.com, earendelartists.com).
- Raised accessibility scores from 70–80% to 95–100% with WCAG fixes (WAVE, IBM Equal Access audits).

Frontend Developer | Softwhere | Remote 2022 – 2024

- Built 2 fintech apps from scratch for NestEgg, a UK loan-matching platform: the borrower app loans.nestegg.ai (multi-step application, TrueLayer open banking, document upload) and a lender dashboard for 20+ lenders with MUI X Data Grid Pro tables and Recharts reports.
- Tested both apps: unit and integration (Vitest, React Testing Library, MSW) and end-to-end (Playwright).
- Migrated the build to Vite, shipped features behind LaunchDarkly flags and moved styling from Styled Components to MUI styled.

Frontend Developer | COYOTE (Kazakhstan) | Remote 2021 – 2022

- Main frontend developer on COYOTE CRM (erp.cascompany.org), a restaurant ERP: warehouse documents, recipe cards and sales reports; finished projects left by juniors (qamqorshy.kz).

Frontend Developer | Paybek (FinTech) | On-site, Uzbekistan 2020 – 2021

- Led and mentored 3 frontend developers; built 4 CRMs from scratch, then extended, refactored and supported them (portal.my-uhl.com).

Frontend Developer | EPAM Systems | On-site, Uzbekistan 2019 – 2020

- Built frontend authentication and authorization for a React Native app (TypeScript, Redux, GraphQL).

PROJECTS

Resume website | shakh-dev.vercel.app

- Next.js site in English, Russian and Uzbek with Feature-Sliced Design; CI runs lint, type checks, Vitest and Playwright tests with an axe WCAG 2.2 AA scan.

SKILLS

Core: JavaScript, TypeScript, React, Next.js, React Native, Redux Toolkit, RTK Query, TanStack Query, Zustand, GraphQL, REST APIs, WebSockets
UI and testing: HTML5, CSS3, Tailwind CSS, Material UI, Mantine, React Hook Form, Zod, Vitest, React Testing Library, Playwright, MSW

EDUCATION

Computer and Information Engineering | Inha University in Tashkent 2015 – 2019

LANGUAGES

Uzbek (native), English (advanced), Russian (advanced), German (beginner)
