EXPERIENCE

Frontend Developer | Itway | Remote 2026 – Present

- Took over Baza-Taxi (dev.baza-taxi.ru), a stalled, AI-generated fleet CRM for a Russia-based taxi company, and built about 70% of its frontend as the only frontend developer on a 7-person team.
- Designed a browser-style multi-tab workspace that keeps each tab's state and scroll position, and built the Drivers, Vehicles, Orders and Fines modules.
- Built infinite-scroll tables for 898,868 orders with RTK Query and TanStack Virtual: filters form the cache key and new pages merge into one cache entry, so scrolling never re-downloads loaded rows.
- Wrote real-time WebSocket events (Laravel Echo, Reverb) straight into the RTK Query cache, so support messages, ticket changes and unread counts appear instantly without refetching.

Frontend Developer | Lumex Agency (USA) | Remote 2024 – 2025

- Led 2 frontend developers and delivered 12 client websites on Next.js, Solid.js, Tailwind CSS and Payload CMS: new builds, features, refactoring and maintenance (nxtarmor.com, earendelartists.com).
- Raised accessibility scores from 70–80% to 95–100% (WCAG; WAVE and IBM Equal Access audits).

Frontend Developer | Softwhere | Remote 2022 – 2024

- Built 2 fintech apps from scratch for NestEgg, a UK loan-matching platform: the borrower app loans.nestegg.ai (multi-step application, TrueLayer open banking, document upload) and a lender dashboard for 20+ lenders with MUI X Data Grid Pro tables and Recharts reports.
- Covered both apps with unit and integration tests (Vitest, React Testing Library, MSW) and end-to-end tests (Playwright); migrated the build to Vite and shipped features behind LaunchDarkly flags.

Frontend Developer | COYOTE (Kazakhstan) | Remote 2021 – 2022

- Main frontend developer on COYOTE CRM (erp.cascompany.org), a restaurant back-office ERP (warehouse documents, recipe cards, sales reports); finished projects left by junior developers.

Frontend Developer | Paybek (FinTech) | On-site, Uzbekistan 2020 – 2021

- Led and mentored 3 frontend developers; built 4 CRMs from scratch (portal.my-uhl.com).

Frontend Developer | EPAM Systems | On-site, Uzbekistan 2019 – 2020

- Built frontend authentication and authorization for a React Native app (Redux, GraphQL, TypeScript).

PROJECTS

Hi Bro | AI guide to restaurant menus, built at Itway

- Built the Next.js guest app from scratch (hibro.am): QR and camera menu scanning, AI chat and a virtualized menu; plus the React admin panel (admin.hibro.am).
- Built an AI menu reader that handles websites, PDFs and photos with one set of rules instead of per-site code: a Playwright browser for app-style sites, checks against wrong "menus" and completeness warnings; parallel PDF photo downloads raised extraction from 31 to 35 of 36 photos.
- Added optimistic updates with rollback in TanStack Query (drag-and-drop menu reordering, guest chat).

Resume website | shakh-dev.vercel.app

- Next.js site in English, Russian and Uzbek with Feature-Sliced Design, light and dark themes and technical SEO (sitemap, hreflang, JSON-LD); CI runs lint, type checks, Vitest unit tests and Playwright end-to-end tests with an axe WCAG 2.2 AA scan.

SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, React Native, HTML, CSS, Sass, Tailwind CSS, WebSockets
Data and testing: Redux Toolkit, RTK Query, TanStack Query, Zustand, GraphQL, REST APIs, Zod, Vitest, React Testing Library, Playwright, MSW
UI and tools: Material UI, Mantine, Ant Design, AG Grid, TanStack Virtual, Framer Motion, Git, Vite, Docker, Figma, Jira

EDUCATION

Computer and Information Engineering | Inha University in Tashkent 2015 – 2019

LANGUAGES

Uzbek (native), English (advanced), Russian (advanced), German (beginner)
