EXPERIENCE

Frontend Developer | Itway | Remote 2026 – Present

- Took over Baza-Taxi (dev.baza-taxi.ru), a stalled AI-generated taxi-fleet CRM in Russia, and built about 70% of its Next.js, TypeScript and Mantine frontend as the sole frontend developer in a team of 7.
- Set the frontend architecture: a browser-style multi-tab workspace that keeps each tab's state and scroll position; built the Drivers, Vehicles, Orders and Fines modules with forms in React Hook Form.
- Built infinite-scroll tables for 898,868 orders with RTK Query and TanStack Virtual: filters form the cache key and new pages merge into one cache entry, so scrolling never re-downloads loaded rows.
- Wired real-time events over WebSockets (Laravel Echo, Reverb) into the RTK Query cache, so support messages, ticket changes and unread counts appear instantly; tested the Laravel REST API in Postman.

Frontend Developer | Lumex Agency (USA) | Remote 2024 – 2025

- Led 2 frontend developers on 12 client websites in JavaScript and TypeScript (Next.js, Solid.js, Payload CMS): Tailwind CSS styling, Framer Motion animation, Redux Toolkit state, Zod validation (nxtarmor.com, earendelartists.com).
- Raised accessibility scores from 70–80% to 95–100% with WCAG fixes in HTML5 and CSS3, audited with WAVE and IBM Equal Access.

Frontend Developer | Softwhere | Remote 2022 – 2024

- Built 2 fintech apps from scratch for NestEgg, a UK loan-matching platform: the borrower app loans.nestegg.ai in Ant Design (multi-step application, TrueLayer open banking, document upload) and a Material UI lender dashboard for 20+ lenders with MUI X Data Grid Pro tables and Recharts and MUI X Charts reports; WCAG fixes in HTML5 and CSS3 in both.
- Redux Toolkit and RTK Query for data, Postman for APIs, Linear for tasks; moved styling from Styled Components to MUI styled.
- Covered both apps with unit and integration tests (Vitest, React Testing Library, MSW) and end-to-end tests (Playwright); migrated the build to Vite and shipped features behind LaunchDarkly flags.

Frontend Developer | COYOTE (Kazakhstan) | Remote 2021 – 2022

- Main frontend developer on COYOTE CRM (erp.cascompany.org), a restaurant ERP: warehouse docs and recipe cards in React, Redux Toolkit, MUI X Data Grid, React Hook Form; Recharts reports; Swagger APIs.
- Finished projects left by juniors, such as qamqorshy.kz (Next.js, RTK Query, Tailwind CSS, Sass).

Frontend Developer | Paybek (FinTech) | On-site, Uzbekistan 2020 – 2021

- Led and mentored 3 frontend developers; built 4 CRMs from scratch (portal.my-uhl.com) in React, Next.js, Redux and AG Grid, styled with Tailwind CSS, Styled Components and Sass.
- Connected REST APIs (Swagger, Postman), set up AWS Amplify landing pages; GitLab, GitHub.

Frontend Developer | EPAM Systems | On-site, Uzbekistan 2019 – 2020

- Built frontend authentication and authorization for a React Native app (TypeScript, Redux, GraphQL with Apollo Client) in an Agile/Scrum team using Git, GitHub, Jira and Figma.

PROJECTS

Hi Bro | AI guide to restaurant menus, built at Itway

- Built the Next.js guest app from scratch (hibro.am): QR and camera menu scanning, AI chat and a virtualized menu; plus the React, Vite and TanStack Router admin panel (admin.hibro.am); Zustand in both.
- Built an AI menu reader for sites, PDFs and photos with shared rules, not per-site code; Playwright in Docker reads app sites; parallel PDF photo downloads raised extraction from 31 to 35 of 36 photos.
- Added optimistic updates with rollback in TanStack Query (drag-and-drop menu reordering, guest chat).

Resume website | shakh-dev.vercel.app

- Next.js in 3 languages, Feature-Sliced Design, SEO; CI runs Vitest, Playwright, axe WCAG 2.2 AA.

EDUCATION

Computer and Information Engineering | Inha University in Tashkent 2015 – 2019

LANGUAGES

Uzbek (native), English (advanced), Russian (advanced), German (beginner)
